

for intervention and acceleration in Kansas

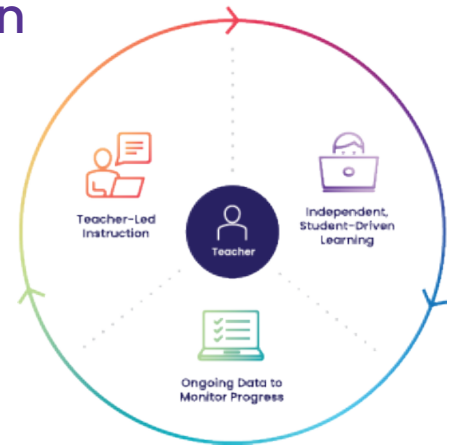

Flexible Implementation for Intervention supporting the KS MTSS Framework

Lexia® Core5® Reading is an adaptive blended learning program that accelerates development of literacy skills for Kansas students of all abilities.

Through the pairing of high-quality instructional intervention and continuous Assessment Without Testing® (AWT) data, Core5 allows students to learn and practice skills at their own targeted place and pace, provides educators detailed insight into their students' skills, and links to specialized instructional resources. **Core5 can be implemented as intensive intervention or targeted instruction.**

How can Lexia's Core5 help accelerate literacy in students reading below grade level? Core5:

- Offers adaptive, individualized literacy learning for ALL students
- Is fully aligned to the Kansas ELA State Standards
- Provides support for English Learners
- Offers flexible implementation for your intervention and instructional model
- Uses Assessment Without Testing
- Provides real-time, actionable data
- Is research-based and proven

“

As a result of Core5 helping to identify and address students' foundational literacy skills gaps, we were able to triple the number of students working in or above grade level in Core5 within one year.
