This document demonstrates how Lexia® Core5® Reading, an Adaptive Blended Learning and literacy acceleration program for all elementary students, corresponds to information introduced in Lexia® LETRS® (Language Essentials for Teachers of Reading and Spelling) professional learning. Examples of Core5 activities are provided and matched to the reading domain and the units where those domains are introduced in the LETRS course of study.

LETRS professional learning aligns to the Minnesota READ Act and is on the state-approved professional development list. LETRS is an investment in teachers' literacy knowledge and professional practice. Teachers gain essential knowledge to master the fundamentals of literacy instruction required to transform student learning.

Core5 supports educators in providing differentiated literacy instruction for students of all abilities in grades pre-K–5, helping make that critical shift of learning to read to reading to learn. Lexia's research-proven program provides explicit, systematic, personalized learning in the six areas of reading instruction, targeting skill gaps as they emerge, and providing teachers with the data and student-specific resources they need for individual or small-group instruction.

BOTH Believe:

- In the power of the science of reading
- Equity for all students can be achieved through literacy
- Teacher knowledge and proven instructional resources are keys to success
- Data-driven reading instruction is critical to meeting student needs and effectiveness
