

Science of Reading Intervention and Acceleration Solutions for Ohio

Flexible Implementation to Support the Ohio MTSS Framework

Lexia® Core5® Reading and Lexia® PowerUp Literacy® are Adaptive Blended Learning literacy programs that accelerate the development of literacy skills for pre-K–12 students of all abilities.

Through the pairing of high-quality instructional intervention and continuous Assessment Without Testing® (AWT) data, Core5 and PowerUp allow students to learn and practice skills at their own targeted place and pace, provide educators detailed insight into their students’ skills, and link to specialized instructional resources. **These evidence-based programs can both be implemented as intensive intervention or targeted instruction.**

How can these ODEW-approved, high-quality instructional materials help accelerate literacy in students reading below grade level? Core5 and PowerUp:

- Offer adaptive, individualized literacy learning for ALL students
- Are 100% aligned to Ohio Learning Standards for ELA
- Generate growth on the Ohio NWEA MAP RIT and the Ohio State Test for ELA
- Provide inclusive support for English Learners
- Connect literacy learning with SEL to facilitate growth
- Provide real-time, actionable data
- Are research-based and proven

[Core5] makes a positive difference with [students’] basic reading skills. Last year, all of my students increased their reading by at least two levels.”

—Cindy Pence
Teacher, Remedial Reading
Groveport Elementary School

89%

of students using Core5 were working on materials at or above grade level by the end of the school year (SY 2023–2024)
