

## Reasons to Choose *for Washington Schools*

Every school in Washington is unique, and Lexia® offers the flexible, personalized learning each school needs to boost student achievement.

- Core5 **aligns to the state-funded Learning Assistance Program (LAP)** for Supplemental Supports
- Individualized, data-driven literacy instruction for all students based in the science of reading
- Provides standards-aligned, teacher-led lessons and resources to match students' needs
- Built on an Adaptive Blended Learning model for flexible implementation with the teacher at the center
- Enhanced with Assessment Without Testing® technology, saving educators valuable instructional time with embedded progress monitoring
- Research-based and proven to work in Washington schools
- Real-time, on-the-spot progress monitoring provides educators the ability to differentiate instruction
- Phonological awareness, phonics, structural analysis, automaticity/fluency, vocabulary, and comprehension taught in a systematic, sequential, and scaffolded manner
- Provides all students—from at-risk to on-level and advanced—a systematic and structured approach to six areas of reading
- Cultivates student ownership of performance and progress toward personal goals
- Flexible fit into existing curriculum—before/after school, at-home/remote learning, classroom center rotations, computer lab
- Promotes social-emotional learning through a growth mindset approach
- High-quality instructional materials and reporting aligned to the Washington State ELA Learning Standards

## What Washington Educators Are Saying About Core5

Lexia Reading Core5 is a game changer for reading instruction. The analytics provided by the program quickly give me the information I need to deliver targeted instruction. My students love improving their reading skills quickly with Core5!

—**Patti Guthrie**, Teacher  
Bethel Virtual Academy

The district quickly realized the advantages of this literacy program for students of all abilities. Schools that were using Core5 with fidelity were seeing significant growth. For example, one elementary school began this school year with 85% of Lexia students reading below their grade level. At just over halfway through the school year, that same number has reduced to 66%.

The program employs a scaffolding approach to student learning, offering guided practice on specific error types if students encounter difficulties, progressively advancing them to higher levels as proficiency is demonstrated. The outcome is more effective learning with guided practice, allowing students to learn at their own pace and on their own level.

—**Jami Roberts**, Director ELA/Social Studies/Library Programs, North Thurston Public Schools

Lexia Core 5 has been a valuable asset to our overall literacy program. It offers an engaging and interactive platform for K-5 students to practice and improve their reading skills. The additional tools provided by Core 5 are appreciated by teachers, as they can deliver targeted mini lessons based on individual student needs. The program's flexibility also allows teachers to work with small groups while students receive timely practice and assessment of foundational reading skills. Lexia Core 5 is making a positive impact on the reading development of our students

—**Darla Offner**, Elementary Director of Curriculum  
Sumner School District

I absolutely love Lexia. All of my students use Lexia Core5 Reading! I appreciate the differentiation and that there are printable resources that I can incorporate in my daily instruction.

—**Rebecca Matthews**, Kindergarten Teacher  
Tehaleh Heights Elementary School
